

ISNAN RIZQI KURNIAWAN

Senior Data Analyst | ETL & Data Warehouse | Strategic Reporting & KPI Dashboards

isnan.rizqikurniawan@gmail.com | 0812-1525-5331 | linkedin.com/in/rizisnan

PROFILE SUMMARY

Results-driven Senior Data Analyst with 4+ years of experience owning the full data lifecycle — from ETL pipeline design and multi-tier data warehousing to KPI dashboard development and cross-functional stakeholder engagement. Proven ability to identify trends, anomalies, and strategic insights from complex datasets, validate findings clearly to relevant stakeholders, and recommend process enhancements that directly impact operational efficiency and business growth across multi-sector and government-linked projects.

WORK EXPERIENCE

Data Analyst | Divisi Digital Business – Telkom Indonesia

May 2022 – Present

- Engineered and maintained executive-level KPI dashboards integrating various data sources (transactional DBs, staging layers, analytics marts), serving 100+ users for real-time strategic decision-making.
- Proactively identified trends, anomalies, and actionable insights through ad-hoc and periodic analyses, delivering evidence-based recommendations that directly shaped corporate strategy and performance metrics.
- Architected a multi-tier data warehouse (transaction, staging, analytics layers) with rigorous standards of data integrity, reducing query latency by 40% and improving data availability across business units.
- Validated analytical findings clearly to relevant stakeholders through structured reports and dashboards, ensuring alignment between data outputs and business objectives.
- Engaged cross-functional stakeholders — including engineering, product, and management teams — to gather requirements, resolve ETL and data integrity issues with a 100% resolution rate, and align reporting to strategic goals.
- Recommended and implemented process enhancements across reporting pipelines and data workflows, standardizing periodic operational reports and driving consistent, timely information delivery.
- Applied SQL and Google Sheets extensively for data extraction, transformation, validation, and ad-hoc reporting across multiple project streams.
- Supervised and mentored data team interns, fostering data quality awareness and analytical best practices.

HR Operations Intern | Digital Business Technology – Telkom Indonesia

Apr 2021 – Sep 2021

- Developed and presented a research-driven mechanism to optimize talent assignment flow within Telkom DBT.
- Collaborated with Data Analysts and Product Owners to ensure integrity and development of the employee assignment database, supporting HR metrics.

EDUCATION

Universitas Pembangunan Nasional "Veteran" Yogyakarta

Graduated April 2022 | GPA 3.67

Bachelor of Informatics
